Value of bullion extracted from mines on the Comstock lode. Answer. Total amount of bullion extracted from this mine is 11, 772, 105 47. Question No. 2. Their present and probable future production. Answer. For the twelve months ending May 31, A. D. 1871, the average monthly yield of bullion was 288, 285 25. For the months of June and July following the bullion production averaged 166, 312. The future yield of bullion necessarily depends on the success of prospecting. At this writing indications are positively and decidedly against the hope that any twelve months in the future will nearly equal the production of the past year. Question No. 3. The geological and practical value of said tunnel as an exploring work. Answer. Geologically, science may derive information of value to students in that branch of learning, although the probabilities strongly favor...
