RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 26 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1915 edition. Excerpt: . . . illiterates, and those who can not speak English is perhaps affected by the fact that they are at the same time generally of the poorest families and are housed in the most insanitary and unhealthful part of the city. AGE. The age of the mother is frequently believed to be a factor in the health of the child. The highest infant mortality rate was found to be that for the group of babies with mothers over 40 years of age, and the lowest for babies of mothers from 20 to 24 years of age. Table 16. --Distribution Of Births And Of Deaths During First Year, Infant Mortality Rate, And Number And Per Cent Of Stillbirths, According To Age Of Mother. The youngest mothers have a higher stillbirth rate than other mothers, and the oldest group of mothers has the next highest rate. In this connection not only the foregoing table is of interest, but also Table XII on page 70, based upon the entire reproductive histories of the mothers included in this study. As all the children borne by these mothers are included, the base numbers in the latter table are larger and the figures therefore somewhat more significant, BABYS AGE AT DEATH AND CAUSE (DISEASE) OF DEATH A baby who comes into the world has less chance to live one week than an old man of 90, and less chance to live a year than one of 80. --Bergeron. The most dangerous...
